Israeli Attacks on Lebanon's **Health Sector**

Hospitals - Primary Health Care Centers - Ambulatory Associations

Introduction

This report serves as a document aimed at recording the attacks on healthcare workers, facilities, and institutions during the Israeli aggression on Lebanon, constituting a flagrant violation of International Humanitarian Law (IHL) and the Geneva Conventions, which stipulate the protection of civilians, healthcare workers, and medical facilities during times of conflict.

The purpose of this document is also to honor the heroes who fell while carrying out their humanitarian duty, to demand accountability, and to re-emphasize the collective responsibility to protect healthcare workers and facilities during conflicts.

Accordingly, the Ministry of Public Health emphasizes the following key points:

1. On the Serious Violation of International Law

- The deliberate targeting of healthcare workers and facilities constitutes a violation of the principles of proportionality and distinction, which are foundational to IHL.
- These attacks are not isolated incidents but reflect a disregard for humanitarian standards, causing severe harm to vulnerable communities by obstructing their access to life-saving care.

2. On the Duty to Document and Verify

- This comprehensive report is an essential tool for collecting, verifying, and preserving records of these attacks, documenting each incident and ensuring that every lost life is remembered.
- Documentation is a critical and necessary step towards seeking accountability, ensuring that these violations are neither ignored nor forgotten, and preventing their recurrence.

3. Paying Tribute to the Heroes of Healthcare

- We dedicate this document to the memory of healthcare workers who gave their lives in service to others. Their sacrifice reflects the immense risks faced by healthcare workers on the frontlines during times of war.
- We are committed to honoring their courage and dedication by raising our voice to continuously defend the protection of healthcare services.

4. On the Sanctity of Healthcare Services and Workers

- The neutral nature of healthcare services and personnel requires protection, and this inviolability must not be compromised even in times of conflict. These facilities and individuals embody humanity's shared commitment to alleviate suffering and preserve life.
- We stress the need to reaffirm the sanctity of healthcare services and emphasize that any attack on them constitutes an assault on universal human values.

5. A Call to the International Community

- We call on the international community to fulfill its responsibility to enforce IHL, hold accountable those responsible for these violations, and ensure that such atrocities do not occur again.
- This report stands as both a testament to these violations and a reminder that justice must not be selective. Impunity breeds further violations, and accountability is the only way to prevent similar attacks in the future.

6. A Call for Collective Responsibility and Solidarity

- Our goal is not only to document the past but to demand solidarity through concrete actions. This call is addressed to all nations, international organizations, and individuals to join in the defense of healthcare services in times of conflict.
- The lessons from this war transcend borders, highlighting that the protection of healthcare is a collective duty. Any threat to healthcare services anywhere in the world endangers the principle of protection as a whole, leaving no facility truly safe.
